🔗 Portfolio

AI/ML engineer with hands-on experience building end-to-end machine learning systems and multi-agent LLM applications, from data pipeline design to model deployment. Strong foundation in explainable AI, with a track record of turning research ideas into working software. Interested in roles that combine technical depth with real-world product impact.

WORK EXPERIENCE

- AI Engineer Intern, Bluesense AI** 06/2025 – 08/2025
Istanbul, Türkiye
- Built and trained a **MobileNetV2**-based **CNN** model for facial skin analysis, achieving **95% macro F1-score** across 10 classes for the SmartBeauty mobile application.
- IT Intern, ADM Electricity Distribution** 07/2024 – 08/2024
Denizli, Türkiye
- Designed and executed **SQL** queries for data extraction and transformation to build reporting workflows that support data-driven **project management** decisions.
 - Analyzed operational datasets to identify trends and inefficiencies, contributing to **system optimization** and better **strategic planning**.

EDUCATION

- B.Sc. in Software Engineering, Istanbul Atlas University (Full Scholarship)** 10/2022 – 06/2026
Istanbul, Türkiye
- HUAWEI Student Developers (HSD), Core Team Member of Technical Development and Training Committee:** Collaborating with a multidisciplinary team to organize technical workshops.

TECHNICAL SKILLS

AI & Multi-Agent Systems: Multi-Agent Systems, RAG (Retrieval-Augmented Generation), LangGraph, Agentic Tool Use

Machine Learning: PyTorch, TensorFlow/Keras, Scikit-learn, XGBoost, LightGBM, SHAP (Explainable AI), Pandas & NumPy

Backend & Languages: Python, FastAPI, SQL

Frontend: Next.js, React, Tailwind CSS

Tools: Git, Docker, Vercel

PROJECTS

- FinAgent: Multi-Agent AI-Powered Investment Advisory and Portfolio Analysis System** 06/2026 – Present
- Developing an investment analysis platform for Turkish retail investors, featuring a proprietary Inflation Protection Score (IPS, 0-100) and real-time market data integration (USD/TRY, Gold, BIST 100) via CBRT EVDS and Yahoo Finance APIs.
 - Architected an 8-agent FastAPI backend with LLM-powered Turkish natural language QA and a Monte Carlo simulation engine (1,000 GBM scenarios).
 - Built a Next.js 14 portfolio simulator with risk-based asset allocation recommendations, backtesting, and inflation/policy-rate correlation analysis across 6 years of historical data.
- Tech Stack:** Next.js 14, FastAPI, LLM Orchestration, Python, Monte Carlo (GBM), EVDS API, Yahoo Finance API, Tailwind CSS
- Multi-Floor Indoor Navigation with Semantic Search and LLM Integration, Graduation Project** 01/2026 – 05/2026
- Built a multi-floor indoor navigation system tested on a real six-floor building, resolving free-form Turkish/English queries into optimal routes via a web app and CLI.
 - Implemented 7 pathfinding algorithms (A*, Weighted A*, Theta*, UCS, BFS, IDA*, Bidirectional A*) on a 65k-cell grid with a time-calibrated cost model based on real walking speeds and MET values.
 - Integrated LLaMA-3.3-70B (via Groq API) for natural language query parsing and route narration across 168 POIs, with a deterministic fallback; delivered as a Flask + vanilla JS SPA with annotated floor-plan visualizations.
- Tech Stack:** Python, Flask, Vanilla JS, LLaMA-3.3-70B, Pillow/ImageDraw, REST API, JSON

Explainable AI-Driven Clinical Decision Support for Genetic Variant Classification

- Developed an end-to-end clinical decision support system using XGBoost and LightGBM for genomic variant classification, with SHAP-based explainability for transparent, clinically verifiable insights.
- Optimized hyperparameters across key metrics (Accuracy, F1-Score, ROC-AUC) to minimize false negatives, prioritizing patient safety and clinical reliability.

Tech Stack: Python, XGBoost, LightGBM, SHAP, Scikit-learn

02/2026 – Present

AI-Powered Real-Time Industrial Voice Assistant

- Designed a speech-to-text and RAG pipeline integrating Whisper (ASR) and Llama-3 for low-latency, context-aware industrial troubleshooting, with intent detection combining semantic retrieval (SentenceTransformers, FAISS) and pattern matching.
- Built an interactive Streamlit interface with TTS integration, achieving 80% Exact Code Match Accuracy under acoustic background noise.

Tech Stack: Whisper ASR, Llama-3, SentenceTransformers, FAISS, Streamlit, Python

11/2025 – 01/2026

TRAININGS & PROGRAMS

AI Innovators Summer Internship Program, Microsoft Türkiye

- Self-directed AI project with weekly mentor check-ins, concluding in a final presentation and Microsoft-issued certificate.

07/2026 – Present

AI Scholar, Artificial Intelligence & Technology Academy

- Google Türkiye-supported program combining academy trainings, a hackathon, and a bootcamp focused on applied AI development.

12/2025 – Present

Future Talent Program, Citi Foundation, YGA & UP School

- AI and Big Data acceleration program, focusing on sustainability analytics and automation.

02/2026 – 04/2026

Data Science Trainee, EPAM Systems

- Developed end-to-end **ML pipelines** including comprehensive EDA, supervised/unsupervised learning, **hyperparameter optimization**, and **MLOps workflows** on complex tabular datasets.

11/2025 – 02/2026

LANGUAGES & CERTIFICATIONS

Turkish: Native

English: B2 - Professional Working Proficiency
