🔗 Portfolio

AI/ML Engineer with hands-on experience in end-to-end machine learning systems and multi-agent LLM applications, spanning from data pipeline architecture to production deployment. Driven by the philosophy that systems must not only function reliably but also produce accurate, interpretable, and actionable outputs.

WORK EXPERIENCE

- | | |
|---|--|
| AI Engineer Intern, Bluesense AI <ul style="list-style-type: none">Built and trained a MobileNetV2-based CNN model for facial skin analysis, achieving 95% macro F1-score across 10 classes for the SmartBeauty mobile application. | 06/2025 – 08/2025
Istanbul, Türkiye |
| IT Intern, ADM Electricity Distribution <ul style="list-style-type: none">Designed and executed SQL queries for data extraction and transformation to build reporting workflows that support data-driven project management decisions.Participated in project meetings and reviewed observations with my manager, gaining practical exposure to data-driven project management processes. | 07/2024 – 08/2024
Denizli, Türkiye |

EDUCATION

- | | |
|---|--|
| B.Sc. in Software Engineering, Istanbul Atlas University (Full Scholarship) <ul style="list-style-type: none">HUAWEI Student Developers (HSD), Core Team Member of Technical Development and Training Committee: Collaborating with a multidisciplinary team to organize technical workshops. | 10/2022 – 06/2026
Istanbul, Türkiye |
|---|--|

TECHNICAL SKILLS

AI & Multi-Agent Systems: Multi-Agent Systems, RAG (Retrieval-Augmented Generation), LangGraph, Agentic Tool Use
Machine Learning: PyTorch, TensorFlow/Keras, Scikit-learn, XGBoost, LightGBM, SHAP (Explainable AI), Pandas & NumPy
Backend & Languages: Python, FastAPI, SQL
Frontend: Next.js, React, Tailwind CSS
Tools: Git, Docker, Vercel

PROJECTS

- | | |
|--|-------------------|
| FinAgent: Multi-Agent AI-Powered Investment Advisory and Portfolio Analysis System <ul style="list-style-type: none">Developing an investment analysis platform for Turkish retail investors, featuring a proprietary Inflation Protection Score (IPS, 0-100) and real-time market data integration (USD/TRY, Gold, BIST 100) via CBRT EVDS and Yahoo Finance APIs.Built a multi-agent FastAPI backend with LLM-powered Turkish natural language QA and a Monte Carlo simulation engine (1,000 GBM scenarios).Developing a Next.js 14 portfolio simulator with risk-based recommendations, backtesting, and inflation/policy-rate correlation analysis across 6 years of historical data. Tech Stack: Next.js 14, FastAPI, LLM Orchestration, Python, Monte Carlo (GBM), EVDS API, Yahoo Finance API, Tailwind CSS | 06/2026 – Present |
| Multi-Floor Indoor Navigation with Semantic Search and LLM Integration, Graduation Project <ul style="list-style-type: none">Built a multi-floor indoor navigation system tested on a real six-floor building, resolving free-form Turkish/English queries into optimal routes via a web app and CLI.Implemented 7 pathfinding algorithms (A*, Weighted A*, Theta*, UCS, BFS, IDA*, Bidirectional A*) on a 65k-cell grid with a time-calibrated cost model based on real walking speeds and MET values.Integrated LLaMA-3.3-70B (via Groq API) for natural language query parsing and route narration across 168 POIs, with a deterministic fallback; delivered as a Flask + vanilla JS SPA with annotated floor-plan visualizations. Tech Stack: Python, Flask, Vanilla JS, LLaMA-3.3-70B, Pillow/ImageDraw, REST API, JSON | 01/2026 – 05/2026 |

Explainable AI-Driven Clinical Decision Support for Genetic Variant Classification

- Developed an end-to-end clinical decision support system using XGBoost and LightGBM for genomic variant classification, with SHAP-based explainability for transparent, clinically verifiable insights.
- Optimized hyperparameters across key metrics (Accuracy, F1-Score, ROC-AUC) to minimize false negatives, prioritizing patient safety and clinical reliability.

Tech Stack: Python, XGBoost, LightGBM, SHAP, Scikit-learn

02/2026 – Present

AI-Powered Real-Time Industrial Voice Assistant

- Designed a speech-to-text and RAG pipeline integrating Whisper (ASR) and Llama-3 for low-latency, context-aware industrial troubleshooting, with intent detection combining semantic retrieval (SentenceTransformers, FAISS) and pattern matching.
- Built an interactive Streamlit interface with TTS integration, achieving 80% Exact Code Match Accuracy under background noise.

Tech Stack: Whisper ASR, Llama-3, SentenceTransformers, FAISS, Streamlit, Python

11/2025 – 01/2026

TRAININGS & PROGRAMS

AI Innovators Summer Internship Program, Microsoft Türkiye

- Self-directed AI project with weekly mentor check-ins, concluding in a final presentation and Microsoft-issued certificate.

07/2026 – Present

AI Scholar, Artificial Intelligence & Technology Academy

- Google Türkiye-supported program combining academy trainings, a hackathon, and a bootcamp focused on applied AI development.

12/2025 – Present

Future Talent Program, Citi Foundation, YGA & UP School

- AI and Big Data acceleration program, focusing on sustainability analytics and automation.

02/2026 – 04/2026

Data Science Trainee, EPAM Systems

- Developed end-to-end **ML pipelines** including comprehensive EDA, supervised/unsupervised learning, **hyperparameter optimization**, and **MLOps workflows** on complex tabular datasets.

11/2025 – 02/2026

LANGUAGES & CERTIFICATIONS

- Turkish:** Native
- English:** B2 - Professional Working Proficiency
- Convolutional Neural Networks (DeepLearning. AI)** 
- Developing Generative AI Applications using Python (IBM)** 
- Foundations of Project Management (Google)**
